Runtime error (at -1-0): Cannot import dll:cutf8>D:\games\S.T.A.L.K.E.R Call of Pripyat\GameuxInstallHelper.dll. From what I saw during installation, .NET Framework 4 should not be installed. What do i do? I tried to run the game without it. But after launching the game and loading the main menu, I get an error: Windows 98 or newer, you can install .NET Framework 4. If you are not familiar with it, read this article: .NET Framework 4. It details how to install and set it up. Once you have installed or configured it, you will need to activate it using "Activation" from the main menu of the game.
