//=====
===== /** *
This is a Button base that draws a button shape. ** This allows you to create your
own button shapes, in any UI scale size without * needing to inherit a parent class.
You can use this class to style your own buttons and widgets. ** If you need a button
with rounded corners at any time, you will have to use something else, since buttons
don't support custom corners. */ UCLASS(collapsible, hidecategories=Object) class
